INTRODUCTION

Full Stack Developer passionate about building scalable systems and AI-powered applications. Experienced in developing production-ready products, healthcare platforms, and GenAI solutions while delivering end-to-end freelance projects using modern web technologies.

EXPERIENCE

Full Stack Developer @Amrutam(February2026 - Present)

- Spearheaded ABHA (ABDM) integration for secure digital health records, implementing ABHA Linking, HPR based Doctor Onboarding.
- Manage the complete Affiliate Platform in production, delivering new features, fixing critical issues, and supporting affiliate-driven revenue growth.

Full Stack Intern @Amrutam(October2025 - January 2026)

- Developing affiliate platform for Amrutam using GoAffPro,boosting affiliate sales.
- Managed ingredient data workflows on Shopify.

ACHIEVEMENTS

SIH2024 FINALISTS(Samudra Saarthi)link:codesamudrasaarthi

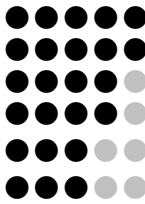

- Built a coastal safety system shortlisted among top 30+ pan-India hackathon projects. Integrated 5+ real-time INCOIS APIs, ML-based risk prediction (92 percent accuracy), live beach safety map, AI Chatbot, and SOS emergency alert system.

Leetcodelink:codewithpriyanshu

- Solved 800+ problems with Contest Rating of 1700+ explored problems across arrays, graphs, DP, and advanced algorithms with consistent 140+ day streak.

SKILLS

DSA in (C++),FULL STACK DEVELOPER
MERN, NextJS,TYPESCRIPT,JAVASCRIPT
MongoDB,Postgress, Prisma
Docker,EC2,S3,Redis,System Design
Gen AI, LLM, RAG, LangChain
Python, Data Science, Machine Learning

PROJECTS

Full Stack Projects

SpendWise:AI-Powered Finance Trackerlink:spendwise

- Developed an AI-powered finance management platform using Next.js, Prisma, Supabase, Clerk Auth, and Gemini API.
- Implemented multi-account management and automated transaction scanning for streamlined expense tracking.
- Integrated real-time budget analytics to deliver actionable financial insights.
- Leveraged Inngest for background workflows and Arcjet for enhanced API security and performance.
- Achieved 50 percent reduction in expense processing time and 30 percent fewer manual errors.

CRM Platform:Smart Customer Relationship Managementlink:crmPlatform

- Designed and developed a modular CRM system with campaign and lead tracking for efficient client management.
- Integrated OpenRouter AI to enable dynamic, automated lead responses and improve engagement efficiency with Google OAuth 2.0 authentication
- Ensured 100 percent secure API communication using Zod validation, Axios interceptors, and JWT-based authorization.

STUDY-NOTION:ED TECH PLATFORMlink:studynotionEdTech

- Developed a comprehensive Ed-Tech portal with 10+ functional modules, including instructor dashboards and student learning interfaces.
- Integrated secure Razorpay payment gateway for course purchases and transactions.
- Implemented cloud-based video storage using Cloudinary for efficient media management.
- Built end-to-end course lifecycle tracking covering creation, enrollment, and progress monitoring.

Gen AI Projects

Nail@Thumb: AI-Powered Thumbnail Generatorlink:nail-thumb

- Developed a production-ready AI thumbnail generation platform using Next.js, TypeScript, Neon PostgreSQL, Vercel Blob, and Gemini 2.5 Flash Image API.
- Engineered prompt enhancement and image-conditioned generation workflows, enabling users to generate and iteratively refine high-quality thumbnails.
- Built persistent multi-thread chat history with PostgreSQL and integrated cloud image storage for efficient asset management.

RAGNETIC: AI-Powered Document Chat Systemlink:ragnetic

- Developed a semantic search and chat application using OpenAI GPT-4.1 integrated with retrieval-augmented generation (RAG).
- Implemented document indexing for PDFs and text files with Qdrant vector database (local and cloud setup)
- Also Scaled up for Documents, Website Link, You-tube Links to chat.

EDUCATION

Maharaja Agrasen Institute of Technology

Btech in Computer Science(CGPA-9.3)

📅 Nov 2022 – Present 📍 Rohini, New Delhi
